Challenging **front-end development internship** in growing software company, **Princh!**

Are you a **talented and innovative front-end developer** looking for an exciting challenge that will take your personal and professional skills to a new level? Would you like to experience the deep passion, **strong team spirit** and fast pace of a startup company?

If your answer to the above questions is a **clear "YES"**, then you might be the person we're looking for to join our **ambitious team** as a full-time intern in the autumn semester of 2017.

Briefly about us:

Princh is a software company in the sharing economy space with an **innovative solution** for **cloud printing.** We're active across most of Northern Europe – and we're just getting started! We are an **international team** funded by a Danish investment company and private investor striving to reach our vision: **To kill the home printer!**

Read more about us here: www.princh.com

What you'll be doing:

In short: **You will be driving the development and maintenance of our web-based front-ends,** including our responsive web-app, customer admin-panel and signup system. Three words you need to know: JS, Bootstrap and REST

Naturally, you will be working **in close collaboration with our software architect** and the rest of the development team!

What we ask of you:

It all starts with **great code** – and you know that very well. We expect you to create (and take a pride in) neat, self-explaining, high quality code. We also expect you to thrive with **small and short development cycles**, rapidly changing tasks and an **informal work environment.** Besides this, we expect you to bring a positive attitude and be an active team player.

What we offer:

We offer you a **unique chance** to learn firsthand what it's like to develop an IT start- up. You'll be an **equal and respected member** of our team. We promise you a steep learning curve where you will quickly see your code come to life and you will be involved in as many aspects of the business as you can manage.

Timing:

The internship period lasts at least ten weeks – but preferably a full semester or longer. **Start, as early as possible and no later than August.**

If the above sounds interesting, don't hesitate to **send your application and CV** to Hans Brink Hansen (hans@princh.com) **as soon as possible.** If you have any questions about the position, feel free to **contact Hans by phone:** +45 61 39 67 39.

We look forward to hearing from you!
