

Exciting software development internships in growing software company, Princh!

Are you a **talented and innovative** software developer looking for an exciting challenge that will take your personal and professional **skills to a new level**? Would you like to experience the deep passion, strong team spirit and fast pace of a startup company?

If the answer is a clear **“YES”**, then you could be one of several people we need to join our development team as a full-time intern for the Autumn semester 2017.

Briefly about us:

Princh is a software company in the sharing economy space with an **innovative solution** for **cloud printing**. We're active across most of Northern Europe - and we're just getting started! We are an **international team** funded by a Danish investment company and private investor striving to reach our vision: **To kill the home printer!**

Read more about us here: www.princh.com

What you'll be doing:

We are looking for several people who will be engaged in the continuous development, improvement and maintenance of our **core software technologies**. Depending on your profile and skills, you will help make our **front end** or **back-end** systems even more powerful. If we say: **Java, JS, C#, .Net, and Python** you should know what to expect.

What we ask of you:

It all starts with **great code** - and you know that very well. We expect you to create (and take a pride in) neat, self-explaining, high quality code. We also expect you to thrive with **small and short development cycles**, rapidly changing tasks and an informal work environment. Besides this, we expect you to bring a **positive attitude** and be an active team player.

What we offer:

We offer you a **unique chance** to learn firsthand what it's like to develop an IT start-up from the ground up. You'll be an **equal and respected member** of our team. We promise you a steep learning curve where you will quickly see your code come to life and you will be involved in as many aspects of the business as you can manage.

Timing:

The internship period lasts at least three months - but preferably a full semester or longer. **Start, as early as possible and no later than August.**

If the above sounds interesting, don't hesitate to send your application and CV to Hans Brink Hansen (hans@princh.com) as soon as possible. If you have any questions about the position, feel free to contact Hans by phone: +45 61 39 67 39.

We look forward to hearing from you!
