

# Challenging web development internship in growing software company, Princh!

Are you a **talented and innovative web developer** looking for an exciting challenge that will take your personal and professional skills to a new level? Would you like to experience the deep passion, strong team spirit and fast pace of a startup company?

If your answer to the above questions is a clear "YES", then you might be the person we're looking for to join our ambitious team as a full-time intern for the spring semester of 2019.

## Briefly about us:

Princh is a software company in the sharing economy space with an **innovative solution** for **cloud printing**. We're active across most of Northern Europe and USA - and we're just getting started!

We are an **international team** funded by a Danish investment company and private investor striving to reach our vision: **To kill the home printer!**

Read more about us here: [www.princh.com](http://www.princh.com)

## What you'll be doing:

You will be driving the **development and maintenance of our web solutions**, including our website, support portal and different self-help tools for our customers. Three words you need to know: WordPress, CSS and JavaScript.

You will be working **in close collaboration with our supporter** and the rest of the development team!

## What we ask of you:

It all starts with **great code** – and you know that very well. We expect you to create (and take a pride in) neat, self-explaining, high quality code. We also expect you to thrive with **small and short development cycles**, rapidly changing tasks and an **informal work environment**. Besides this, we expect you to bring a positive attitude and be an active team player.

## What we offer:

We offer you a **unique chance** to learn firsthand what it's like to develop an IT start-up from the ground up.

You'll be an **equal and respected member** of our team. We promise you a steep learning curve where you can and will be involved in as many aspects of the business as you can manage.

## Timing:

The internship period lasts at least three months – but preferably a full semester or longer. **Start, as early as possible and no later than January 2019.**

**Application deadline:** as soon as possible.

If the above sounds interesting, don't hesitate to **send your application and CV** to Morten Bloch Müller ([bloch@princh.com](mailto:bloch@princh.com)) **as soon as possible**. If you have any questions about the position, feel free to **contact Morten by phone:** +45 61 79 66 56. We look forward to hearing from you!
