

devOps engineer - Join an ambitious team and grow your skills!

Do you have a **passion for building and tuning kick-ass systems and infrastructure for continuous delivery of software that makes a real difference for people in their everyday life?** Do you want to be part of a team where **your opinion is valued, your expertise is trusted** and your engineering skills depended on every day?

Do you want to join a **highly motivated team** and rapidly growing software scale-up?

If your answer to the above questions is a **clear “YES”**, then read on.

Briefly about us:

Princh is a strong player in the sharing economy space with an **innovative solution for cloud printing and electronic payment**. We're the leading solution in Northern Europe and growing fast in North America – and we're just getting started!

We are an **international team** funded by professional investors fighting to reach our vision: **Become the printing and payment standard in the public space!**

What you'll be doing:

You build, operate and optimize the development tools and infrastructure that allows us to seamlessly turn high quality code into value for our customers and users. You work closely with the rest of the team to remove any bumps on the road from idea to release.

Cool things you'll be working with:

- **Kubernetes, Docker, AWS, MongoDB, RabbitMQ**
- **Gitlab CI/CD**
- **Event driven micro services**
- **The right tool for the right job**

A typical day involves planning and executing new releases, finding and testing ways to further optimize our pipeline, enhance the performance and security of our systems and ultimately have more fun and less pain.

What we ask of you:

You're **curious and confident** by nature – yet humble. You're an **excellent communicator and understand the importance of teamwork**. You have a positive and strong mind and **fight hard to achieve your goals**.

You enjoy learning and using new technologies with the purpose of improving the team's performance. You are great at solving problems and have a good eye for details.

A specific educational background is not critical for us. However, you must have a **strong theoretical base and a practical mindset**. We also expect you to have a few years of **working experience in a similar role**.

What we offer you:

We offer you a unique chance to learn firsthand what it's like to **develop and grow a software company**.

Expect to join an **informal and pleasant working environment** with great conditions for growing as a person and a professional. You will be challenged and supported in **continuously enhancing your skills and toolbox**.

Process:

We're looking for just the right person with the right skillset and personality and will be reviewing applications and conducting interviews continuously.
